

Technical Evaluation of Learning Object Repositories

- (1) scalability;
- (2) ease of working on code-base, extensibility;
- (3) security;
- (4) interoperability (ability to integrate with other repositories – OAI-PMH compliance, and ease of integration with systems such as VLEs (Virtual Learning Environments));
- (5) ease of deployment, ability to support multiple installations on a single platform (required for hosting facility);
- (6) ease of system administration (ability to configure for different uses);
- (7) internationalisation – multiple language interfaces;
- (8) open source (type of license);
- (9) quality and configurability of workflow tools;
- (10) strength of community
